Dear Rex,

I just wanted to say thank you for everything you did to help me with my mother's foreclosure. The couple that purchased her home had no intentions of ever paying her and without your help we would still be in conflict with the buyers. The amount of frustration my mother was dealing with in regards to the lack of communication & commitment with these people was so high I was concerned for her health.

After only a few months you were able to reach a settlement agreement with the buyers and my mother received more than 95% of the principal amount that was due, without ending up in court. Your professionalism and follow through was greatly appreciated. You kept me informed at all times and always returned my calls and emails with the utmost professionalism and genuine concern for my mother's rights.

Thank you again for everything and should I ever need legal assistance or know of someone that needs your services I will most definitely refer them to your office. A copy of this letter will also be sent to the county office that referred me to you.

Regards,
